CLAIMS 1-21 ARE PRESENTED FOR EXAMINATION

DETAILED ACTION

Election/Restrictions

This application contains claims directed to more than one species of the generic invention. These species are deemed to lack unity of invention because they are not so linked as to form a single general inventive concept under PCT Rule 13.1.

The species are as follows:

- I. Claims 1-15, drawn to a method for the treatment of Type 2 diabetes mellitus;
- II. Claims 16-20, drawn to pharmaceutical compositions; and
- III. Claim 21 drawn to an analytical procedure.

Applicant is required, in reply to this action, to elect a single species to which the claims shall be restricted if no generic claim is finally held to be allowable. The reply must also identify the claims readable on the elected species, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered non-responsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by

Art Unit: 1617

37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

The claims are deemed to correspond to the species listed above in the following manner:

Each of the species is unrelated since they claim a composition and method for the use thereof.

The restriction is deemed proper due to the fact the species have acquired a separate and distinct status in the pharmaceutical art. The following claim(s) are generic: 1, 16 and 21.

The species listed above do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, the species lack the same or corresponding special technical features for the following reasons:

They have been established as separate and distinct in the pharmaceutical art for the reason stated above.

Inventions of Group I and Group II are related as process (method) and apparatus (compositions) for its practice. The inventions are distinct if it can be shown that either: (1) the process as claimed can be practiced by another materially different apparatus or by hand, or (2) the apparatus as claimed can be used to practice another and materially different process. (MPEP § 806.05(e)). In this case the compositions of Group II can be used to treat schizophrenia.

Invention of Group III is drawn to an analytical procedure which is a recognized separate and distinct invention in the pharmaceutical art.

Art Unit: 1617

There would be a burden on the examiner since the claims are drawn to separate and distinct inventions.

Further restriction may be required.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Theodore J. Criares whose telephone number is 308-4607. The examiner can normally be reached on 6:30 A.M. to 5:00P.M. Monday through Thursday.
